

February 12, 2021

Dear Residents, Families, Staff and Vendors of Roselani Place,

Hooray! During this past week, active COVID-19 case counts have decreased down to 0 at Roselani for staff as well as residents. Upon meeting with the Department of Health the other day it was determined that our 1 active resident case and 1 pending resident case have both been ruled out as **false positives**. We are proud to then have 0 active residents & staff.

As part of our routine testing regime of staff and residents, in connection with ongoing support from our epidemiologist and local state Health Department, since Jan 11th, we have had 5 confirmed staff cases; 0 residents.

Since testing for this 2nd round of positive tests, we have administered 490 total tests thus far, with a 1.02% positivity rate (5 total cases). Again this past week all COVID tests that were administered, thankfully came back negative.

Yesterday 23 tests were conducted and returned back presumptive negative and we wait for those PCR results to return from the state lab in the next few days. The last round of testing will conclude today and staff will now undergo surveillance testing.

In addition, we are excited to let everyone know that communal dining is set to open up on February 17 following social distancing and extended meal service times. Resident and family outdoor visits are planned to resume on Monday, February 15.

The on-site vaccine clinic went well yesterday, vaccinating 57 residents who obtained their 2nd Moderna shot. Staff on site also received their shots.

We really appreciate everyone's ongoing support. We could not have done this without the continued support of Dr. Lorrin Pang, Heidi Taogoshi RN, Takako Nakaaki, Donna Nozaki and the incredible team at the Maui Health District Lab, the state Dept of Health and the HAI team. We are thankful to have this 2nd wave of cases come to a conclusion and will continue to do our best to avert further positive cases.

Best regards,

Karl Drucks
